

# CLIENT TESTIMONIAL

Discover the impact of SureHire's Fitness-to-Work Program on Health & Safety in the Construction industry!

## OVERVIEW

**Morgan Construction and Environmental Ltd.** is a privately owned civil construction and environmental projects company headquartered in Edmonton, AB. They have a strong passion for Safety, Commitment, People, and Quality and with that, began utilizing SureHire exclusively in 2021 to support these core values.

## THE RESULTS

Since implementing our Fitness-to-work program as part of their Pre-Employment testing process, they have seen an **81% reduction in WCB claim costs** (see below):

**2021** = \$425.83 per employee

**2022** = \$84.77 per employee

In addition, they have seen a **significant reduction in claims**.

*'We have benefitted the most from the fitness testing by reviewing every completed test between Level 2-5 to assess the risk of having the candidate proceed. Potential candidates are screened based on their health concerns, past injuries, or incomplete testing due to various reasons. We have not encountered any workplace claims associated with any Level 2-5 since we started fitness testing with SureHire in 2021.'*

*'Another benefit of this is the availability and honesty of your fitness reviewers. They provide so much valuable, unbiased feedback when we call to discuss a candidate concern. This helps us immensely in understanding any issue and guide us in our decision to move forward or not with the candidate.'*

**- Morgan's Director of Health and Safety**
